QCI MARINE OFFSHORE, LLC AWARDED KEY ACCOMMODATIONS PROJECT FOR QUIP, S.A.

Leading Marine Construction Company to Outfit 27,000 Square-Foot Floating Producing Unit

Houston (June, 2009) – QCI Marine Offshore, LLC (“QCI”) announced today it has received an award from QUIP, S.A. to construct the accommodations module for its new P-55 FPU. Headquartered in Rio de Janeiro, QUIP is a leading EPC firm in the Brazilian Oil & Gas Industry.

The 2500-square-meter marine construction project will include 102 staterooms, all with en-suite bathrooms, a central control room, galley with stores and dining hall, recreation room, library, offices, video conferencing and hospital. The accommodations will also comprise an elevator and a helideck for an S-92 helicopter.

“We are truly honored to be awarded the opportunity to work with a company of QUIP’s outstanding reputation and on such a significant project as the P-55, said Chris Cantele, President of QCI. “We believe this contract is a testament to our experience and long history of delivering on-time, on budget marine projects to our customers, thus allowing them to achieve their goals.”

Delivery is anticipated for June 2010. This FPU will be deployed in the Roncador field in the Campos Basin off the coast of Rio de Janeiro, Brazil. The development includes a production unit capable of processing up to 180,000 barrels of oil per day in approximately 1800 meters of water.

About QCI Marine Offshore

QCI Marine is a turnkey marine construction company specializing in cost-effective accommodation solutions, both purpose-built and modular, for the shipping and offshore oil and gas industries.
